1 For **high risk**  
patients

Is patient bed near nursing station  
necessary?  
Has delirium orderset been placed by  
primary team?

2 For **all** patients

Is this patient taking any high delirium-risk  
medications?  
Are family members available?  
Are there any special communication  
issues?  
If patient wears glasses, hearing aids, or  
dentures are they immediately available?
